## PCS Students Continue to Thrive!

Standardized testing for grades 3rd thru 8th, is a snapshot in time of a student's overall progress. It is a comparison score to the child's progress matched against the progress of students across the nation. The SAT-10 measures concepts, processes and skills taught throughout the nation.

Standardized testing also provides information about the overall performance as a school and helps the school to evaluate the impact of curriculum and instruction. We are delighted to see that our students have scored above the national median in every grade. This means that as a group, the average PCS student scores above grade level. This represents the hard work of our students, and the dedication of our teachers and parents. Together, PCS provides a growth-minded environment in which to learn.
